

Inventor Assignment

Title: "System and Method for a Privacy-Aware Memorial Social Platform with Live Rooms, Adaptive Persistence, and Moderation Workflows"

This Inventor Assignment ("Assignment") is made effective as of **[Date]** by and between the undersigned inventors and **[Assignee Name]**.

1. Assignment

The undersigned inventors hereby assign, transfer and convey to **[Assignee Name]** all right, title and interest in and to the invention described in the provisional patent draft titled "System and Method for a Privacy-Aware Memorial Social Platform with Live Rooms, Adaptive Persistence, and Moderation Workflows" and any related patent applications, continuations, divisions, reissues, renewals, continuations-in-part, and extensions thereof, and the patents issuing thereon.

2. Consideration

The inventors acknowledge receipt of good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged.

3. Further Assurances

Each inventor agrees to execute such further documents and take such actions as may be reasonably requested by **[Assignee Name]** to carry out the purposes of this Assignment.

4. Representations

Each inventor represents and warrants that they believe themselves to be the original and sole inventor(s) of the subject matter assigned herein and that the subject matter is not known to have been previously assigned to any other party.
